

MyDataCoin

Your Quantum Data Is Your Digital Asset

Partners and Incubators

MyDataCoin /maɪ-'deɪ-tə-kɔɪn/

noun

1. **The first user-driven platform that puts individuals in control of their personal data** — seamlessly enabling transparent consent, secure sharing, and monetization with trusted organizations.
2. **The best decentralized solution for data privacy and monetization** — building a future where individuals are empowered to manage and benefit from their own data.

“I use MyDataCoin because I know my data is protected and I’m in control.”

“I use MyDataCoin because my data earns for me, creating value in my daily life.”

Analogies: The *Robinhood of personal data*, enabling individuals to “invest” their data with consent; the *Salesforce for data management*, connecting users and organizations in a compliant and transparent ecosystem.

OUR TEAM

ADVISOR AND FOUNDER

DASTAN DOGOEV

Former Deputy Chairperson of the Cabinet of Ministers. Ex-Minister of Digital Development of the Kyrgyz Republic.

CEO AND CO-FOUNDER

IT Director with more than 10 years of experience developing and supporting complex infrastructures and technical solutions.

CHIEF OFFICER ON STRATEGIC DEVELOPMENT AND COMMUNICATIONS

TATYANA SHAHIN

18 years of experience in Integrated Business Communications, Strategic PR and Digital Communications.

CHIEF LEGAL OFFICER

TIMUR ALKHOZHAEV

The main specialization is GR, authorities industry and anti monopoly regulators.

PROBLEM

Your Data: A Puzzle You No Longer Control

1. You Are More Not A Product, You Are More Than Data Points

Every piece of data — location, interests, habits — is part of your unique “puzzle.” Together, they form a complete picture of you.

2. Today’s Reality: Full Puzzle Exposed

Current systems hand over the entire image. Once shared, companies analyze, store, and monetize it, piece by piece, without ongoing consent or transparency.

3. Lost Trust, Lost Control

You can’t selectively choose which pieces are shared or for how long. This constant exposure of the full puzzle breaks trust and strips you of control.

SOLUTION

Quantum Data: Your Data, On Your Terms

Micro-Fragmented Data Control

Break data into secure micro-units with individual conditions, making each piece accessible only when needed and under strict terms.

Transparent Access Ledger

Every access is logged in real-time. **See who accessed what, when, and why**, providing full accountability at a glance.

Automatic Expiration

Temporary data sharing means **your data deactivates automatically** once it's used, preventing unintended access or storage.

Monetize Each Piece

Set terms and value for each micro-unit of data. **Get rewarded for data sharing on your terms**, creating a new revenue stream.

ADVANTAGES

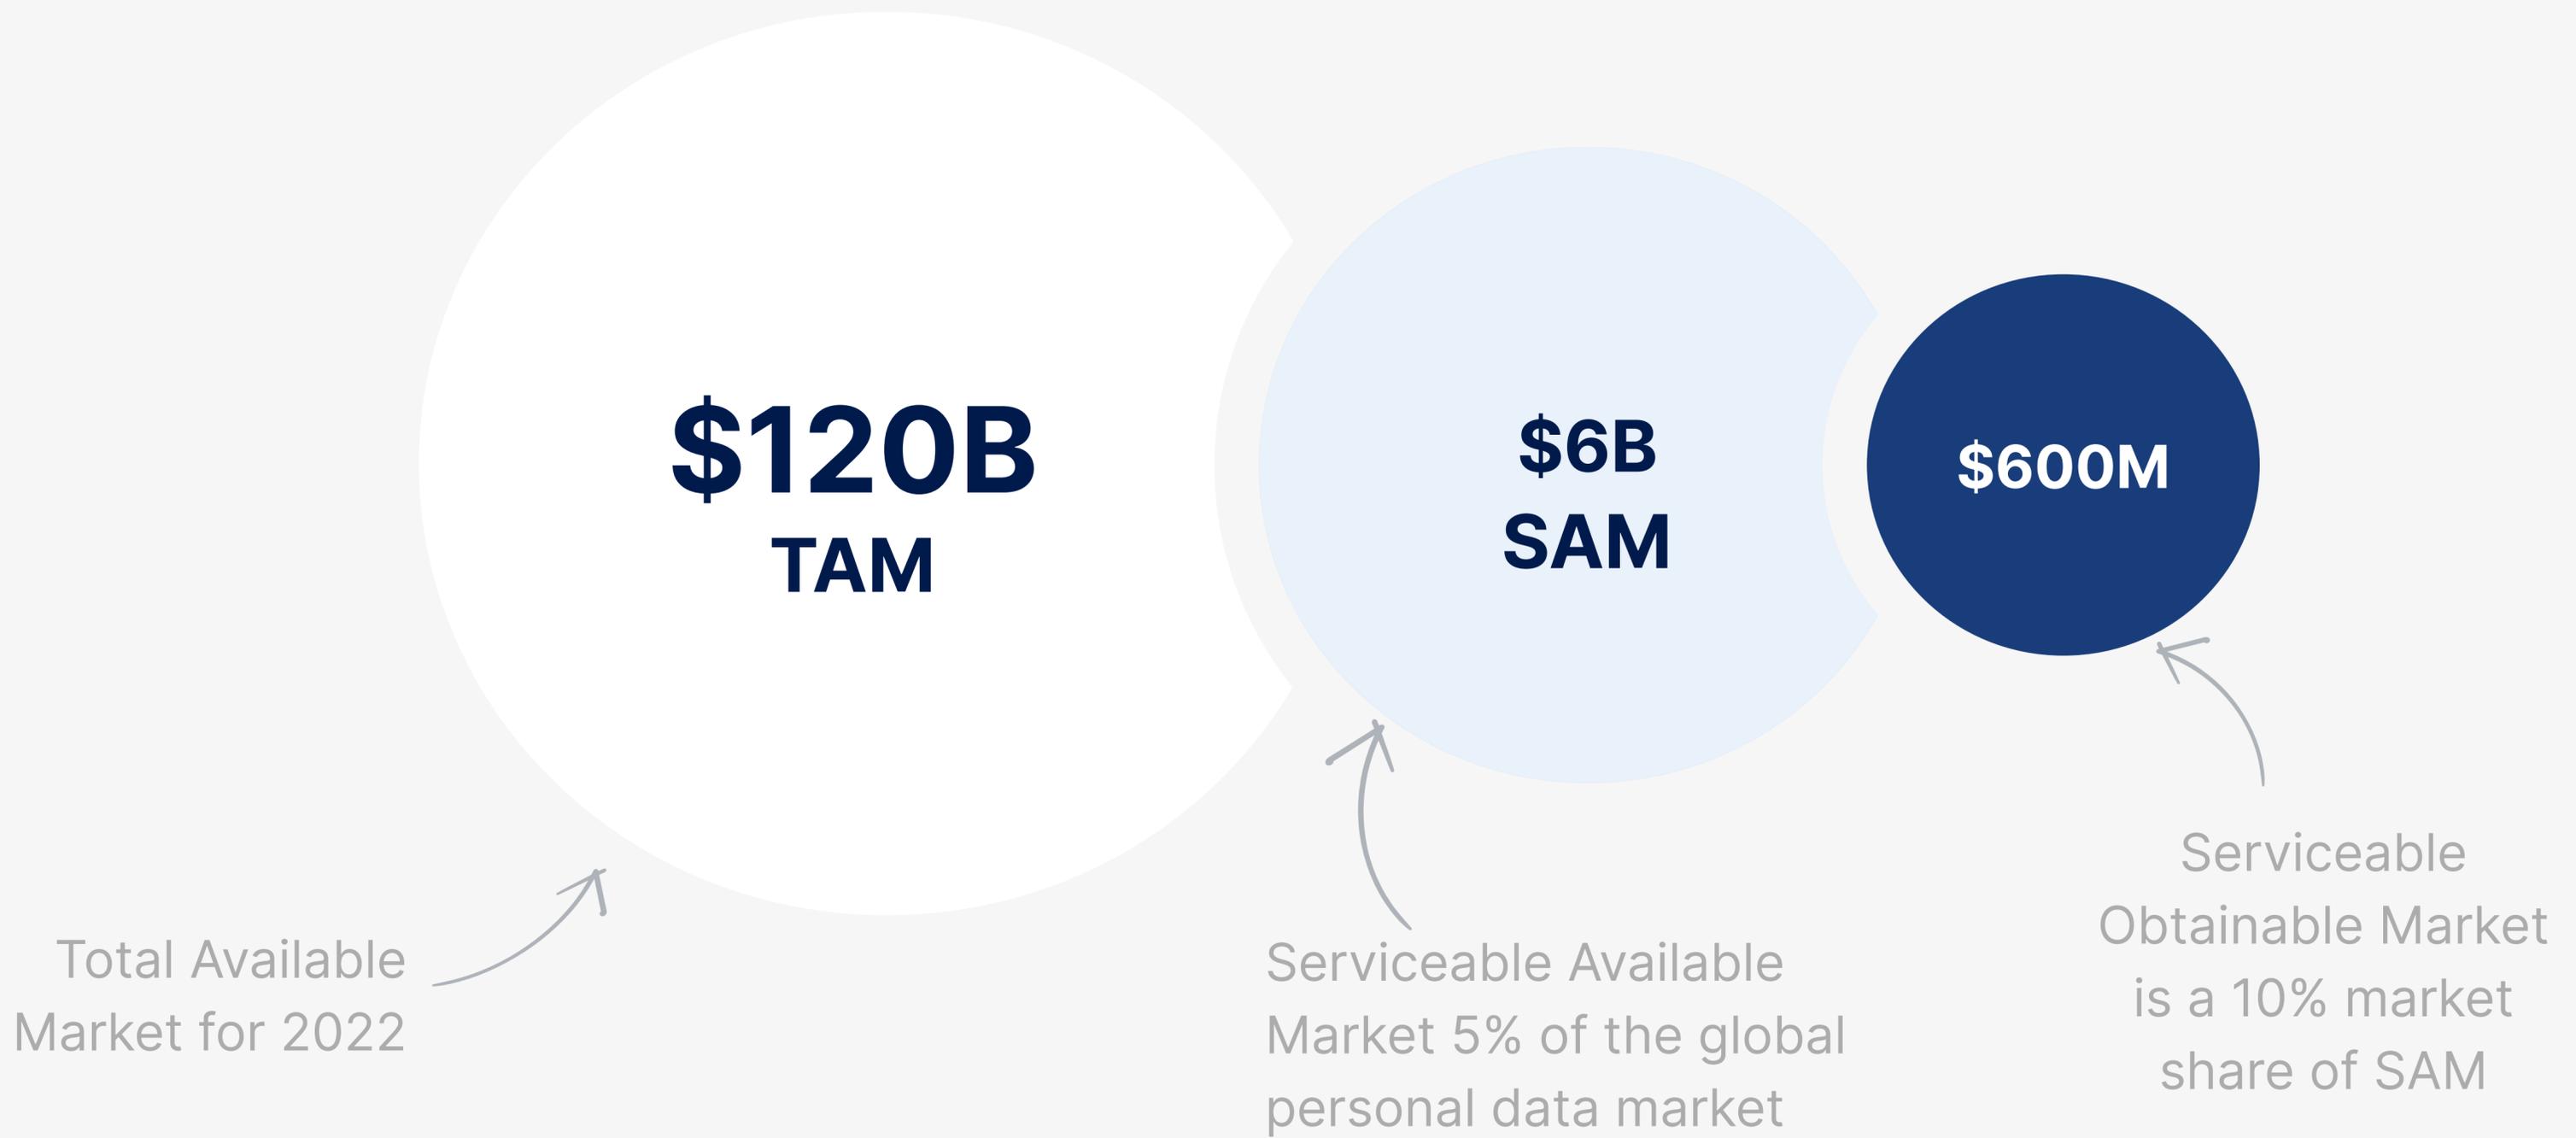

Compliance-Ready

The granular and temporary access model aligns well with privacy regulations (e.g., GDPR, CCPA), making it easier for companies to comply and for users to exercise their data rights

| Feature | Quantum Data | SSI/DID | ZKP | Centralized |
|---|----------------------------|---------------------|---------------------|--------------------|
|  Data Fragmentation | Micro-units, flexible | Attribute-level | No fragmentation | Whole data |
|  Access Control | Auto via smart contracts | Manual | Limited, single-use | Company-controlled |
|  Temporary Access | Auto-disable | Persistent | Single-use | Persistent |
|  Microdata Monetization | Per fragment possible | None | Not applicable | Whole data |
|  Transparency | Full per fragment | Limited | None | Minimal |
|  Compliance | High, flexible | Compliant | Partial | Hard to revoke |
|  Leak Resistance | High, auto-encrypt | ID-level protection | High | High risk |
|  Complexity | Medium, requires contracts | Low/Medium | High | Low |

MARKET SIZE

Annual growth rate (CAGR) of around 17% from 2022 to 2035 (\$1.6T)

CUSTOMER ACQUISITION

Marketing strategy

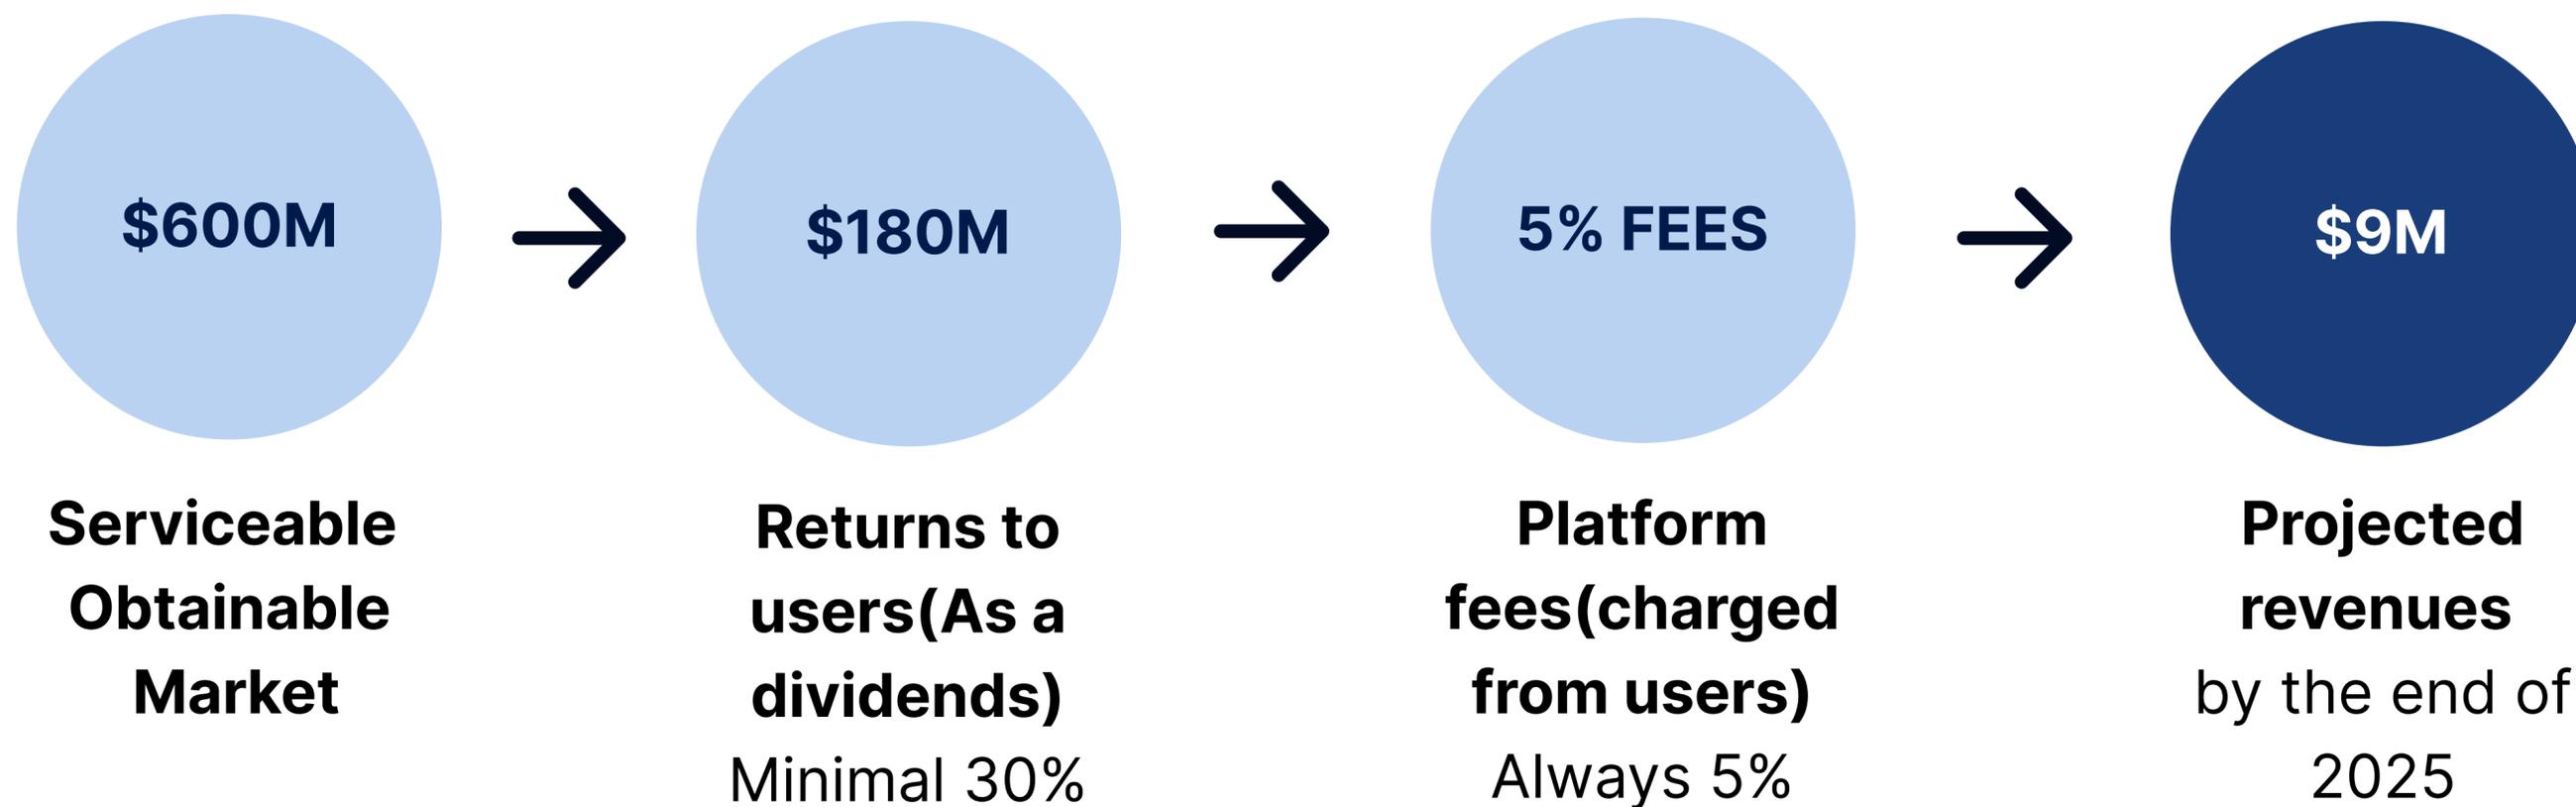

-  **Build a Community and Gather Feedback**
-  **Target Key Privacy & Data Enthusiast Communities**
-  **Build Awareness Through Educational Content**
-  **Offer Data Monetization Demos and Incentives**

The uniqueness of our solution:

- At the moment, there are no alternative private services on the market that provide such solutions, with the exception of the public service.
- We strive to revolutionize the personal data market by providing a secure and innovative solution that meets customer requirements.

BUSINESS MODEL

5% commission on each transaction

The business model of MyDataCoin is based on creating a marketplace for personal data that benefits both individuals and companies, while generating revenue for the platform through a 5% commission fee.

TRACTION

Some of our numbers since Sep 2022

- We held constructive meetings with representatives from the **Ministry of Digital Development, Innovation, and Aerospace Industry of the Republic of Kazakhstan.**
- At the initial stage of our project, Antler offered a valuation of \$1M (**with \$100,000 for a 10% stake in our project**).
- Additionally, we successfully integrated solutions that provide legal access to citizens' consent through the use of **cloud-based digital signatures (e-signatures)**.
- We signed an agreement with the **Social Fund of the Kyrgyz Republic**, under which MyDataCoin serves as a provider for obtaining **legal consent** from citizens, which is necessary for data collection and scoring.

FIRST SUCCESSFUL CASE

We have successfully reached an agreement with the first customer and supplier.
